Technical Product Specification & Interface Guidelines

Component ID: COMP-001	Revision: A
Document ID: DOC-SUP-COMP-001	Effective Date: 2026-10-01
Part Description: Precision Alumina Substrate Carrier	Status: Authoritative Supplier Release

1. Product Overview

The COMP-001 is a high-grade ceramic substrate carrier designed for surface-mount hybrid circuits. This document serves as the authoritative supplier technical specification for revision A of component COMP-001. All physical dimensions herein supersede preliminary notes.

2. Physical Dimensions & Mechanical Parameters

Mechanical measurements for component ID COMP-001 under standard test conditions (25°C, 50% RH). Note the primary dimensional measurements recorded below:

Component thickness: 0.8 cm.

Parameter	Nominal Value	Tolerance	Notes
Length	25.0 mm	±0.1 mm	Longitudinal body axis
Width	15.0 mm	±0.1 mm	Transverse body axis
Thickness	0.8 cm	±0.02 cm	Overall substrate height
Substrate Material	96% Al2O3	—	High-purity alumina

3. Synthetic Demonstration Notice

This datasheet is entirely synthetic demonstration data created for testing and verifying the Engineering Data Investigation Copilot. It simulates an authoritative supplier document containing the exact passage "Component thickness: 0.8 cm." to validate automated unit-mismatch detection and deterministic arithmetic verification against records specifying 0.8 mm.
